

Program: Coding

Grade: 7 & 8

Module: Web Development

Lesson: 16

Homework

Story:

You've been tasked with setting up the website for a new restaurant, and your job is to ensure that the **menu** looks appealing to hungry customers. You've already completed one part, but now it's time to add a little more!

Your Task:

• Add a New Section

The restaurant wants to showcase its **Special Offers**. Create a new section below the "Our Menu" area, titled "Special Offers." Include a brief description and one example of a special deal the restaurant is offering (e.g., "Buy 1 Get 1 Free on Appetizers").

• Style Your New Section

Make sure the "Special Offers" section fits with the overall theme of the page. Adjust the background color, font size, and alignment so that it looks neat and eye-catching.

• Question for You:

What did you like most about creating the new section? Did you find it easy to style the new content, or was there something tricky?
