

Program: Coding

Grade: 7 & 8

Module: Web Development

Lesson: 14

Homework

Story:

You've been assigned as the web developer for the **Local Business Directory** website! Your task is to make sure everything is perfect for the local community to find businesses easily. Let's help your neighbors find the best services!

Your Task:

Add a New Business Category

The directory is missing a category! Add a new section below the "Services" area called "Popular Categories." In this section, create at least three categories like "Restaurants," "Salons," and "Mechanics." Each should have a title and a brief description.

Style Your New Section

Make sure your new "Popular Categories" section looks just as good as the "Services" section. Add some basic styles like a background color, padding, and ensure the text looks clean and readable.

Question for You:

Which part of the website did you find the most fun to work on? Were there any challenges in adding the new section?
