**Program:** Coding
Grade: 7 & 8
Module: Web Development
Lesson: 10

Homework

Story:
You're the event planner for the **98th Percentile Carnival**! Your job is to make sure everything looks perfect and ready for the big day. You've already set up the main stage, but there's still some magic missing in a few areas.

Your Task:

Add a New Attraction
The carnival needs a special schedule for performances! Create a new section under the hero area, titled "Carnival Schedule." Add a short description of the fun events happening throughout the day. What time will the fireworks go off? When will the live performances start?

Style Your Section
Give the new section some flair! Make the title stand out by increasing its size and choose a background color that feels festive. Add a little padding to make sure the text doesn't feel too squished.
