**Program:** Coding
Grade: 7 & 8
Module: Web Development
Lesson: 17

Homework

Story:
You've been hired as the lead designer for the **98th Percentile Aquarium Gallery** website. Today is your first day on the job, and your task is to set up the basic structure of the website. You've already made progress, but the gallery needs a bit more magic to truly capture the beauty of the underwater world!

Your Task:

Add a New Section
The gallery needs a special section called **"Featured Aquatic Creatures"** to showcase unique animals like sharks, jellyfish, and coral reefs. Add this new section to the website below the video area. Each creature should have a title and a short description.

Update the Navigation Bar
Make sure visitors can easily navigate to the new section! Add links for **Sharks**, **Jellyfish**, and **Coral Reefs** in the navigation bar so people can jump directly to these areas.
