Program: Coding
Grade: 7 & 8
Module: Web Development
Lesson: 13

Homework

Story: The "Eco Explorers" website is coming together, but now it's time to make it even better! Today, you're going to add more life to the page. You'll enhance the layout by arranging an image beside your text about eco-friendly habits, making the section more visually appealing.

Your Task: Use CSS to position the image next to the text, making sure everything looks well-organized. Then, add a new social media icon, like Pinterest, to encourage people to share these eco-friendly tips with others.

Question: What changes did you make to improve the look of your page, and how do these changes help make the website more engaging?
